INDEX TO VOLUME XXVIII.

[NOTE.—In this index the titles of principal papers and the headings of departments, as *Discussion*, are in italics.]

Actinolite, 226, 231, 641
Adler, O., on alkalinity produced by bacteria and algae, 762
Adramiti, Turkey, ancient mining, 31
Adularia, 228
Agricolae, G., on underground surveying, 38
Albite, 47
Albite porphyry, 739
Albitite dikes, 650
Albitization, of graphic pegmatite, 47
Alden, W. C., on fuller's earth, Clinton, Mass., 363
Alkali sulphide solutions, Alteration of pyrite to pyrrhotite by (Stevens), 1; *The solubilities of metallic sulphides in* (Gruner), 773
Allen, E. T., on the synthesis of pyrrhotite, 5
and Crenshaw and Johnston: on the reduction of sulphates, 424
Allied sciences in ancient times, Economic geology and its (Sagui), 20
Alling, H. L., discussion by, 695
on quantitative microscopic methods, 695
and Valentine, W., on quantitative microscopic analysis, 696
Allison, I. S., review of book by, 187
Almandite-spessartite garnet, 53
Altaite, 682
Alteration of pyrite to pyrrhotite by alkali sulphide solutions (Stevens), 1
Alteration, accompanying mineralization, 721
Boone formation, 783
chloritization aureoles, "blackwall," 640
glauconite, Olmstead, 353
granite, 499
hydrothermal, magnetite, northern N. J., 674
hypohydrous, 655
peridotites, 638, 647
picrite to soapstone, 638
pyroxenites, 647
soapstone vs. talc deposit type, 646
ultrabasics by acid intrusives, 646
wall, pegmatitic, 53
Alteration—*Continued*
wall rock, 338
wall rock, hypothermal zone, 530
Aluminous silicate deposits, 694
Aluminum sulphate, conversion of, 397
Alunite, 397
Amblygonite, 455
American Institute of Mining Engineers Series, review of four books by, 402
Analyses (see Chemical Analyses)
Anamorphism, iron-bearing formation, 770
Ancient literature of economic geology, 20
Ancient mines, age of, 22
Ancient mining, central France, 25
Ancient times, Economic geology and its allied sciences in (Sagui), 20
Andersen, O., on a biotite crystal, 455
Anderson, A. L., *Genesis of the mica pegmatite deposits of Latah County, Idaho*, 41–58
on Lava Creek district, Idaho, 331
Andrews, E. C., on pipe-like pegmatites, 461
Ankerite, 135
Anthraxylon, 563
Aplite, 206
Appalachian geologic cycle, Paleozoic, 311
volcanism, 312
Appalachians, central, Triassic contact metamorphism, 619
Appel, J. E., *A film method for studying textures*, 383–388
Application of the quartz spectrograph to the study of opaque minerals (Haycock), 364
Aquamarine, Conquista, Bahia, 291
Minas Geraes, 290
Arshinoff, V. V. and Merenkoff, B. J., on lime in asbestos, 176
Asbestos, brittle, origin, 175
Asbestos veins, origin, 649
Ashley, G., on slope of the pre-Cretaceous surface, 623
Asphalt deposits of western Kentucky, The origin of the (Russell), 571
Augite syenite, 727

INDEX TO VOLUME XXVIII.

[NOTE.—In this index the titles of principal papers and the headings of departments, as *Discussion*, are in italics.]

Actinolite, 226, 231, 641
Adler, O., on alkalinity produced by bacteria and algae, 762
Adramiti, Turkey, ancient mining, 31
Adularia, 228
Agricolae, G., on underground surveying, 38
Albite, 47
Albite porphyry, 739
Albitite dikes, 650
Albitization, of graphic pegmatite, 47
Alden, W. C., on fuller's earth, Clinton, Mass., 363
Alkali sulphide solutions, Alteration of pyrite to pyrrhotite by (Stevens), 1; *The solubilities of metallic sulphides in* (Gruner), 773
Allen, E. T., on the synthesis of pyrrhotite, 5
and Crenshaw and Johnston: on the reduction of sulphates, 424
Allied sciences in ancient times, Economic geology and its (Sagui), 20
Alling, H. L., discussion by, 695
on quantitative microscopic methods, 695
and Valentine, W., on quantitative microscopic analysis, 696
Allison, I. S., review of book by, 187
Almandite-spessartite garnet, 53
Altaite, 682
Alteration of pyrite to pyrrhotite by alkali sulphide solutions (Stevens), 1
Alteration, accompanying mineralization, 721
Boone formation, 783
chloritization aureoles, "blackwall," 640
glauconite, Olmstead, 353
granite, 499
hydrothermal, magnetite, northern N. J., 674
hypohydrous, 655
peridotites, 638, 647
picrite to soapstone, 638
pyroxenites, 647
soapstone vs. talc deposit type, 646
ultrabasics by acid intrusives, 646
wall, pegmatitic, 53
Alteration—*Continued*
wall rock, 338
wall rock, hypothermal zone, 530
Aluminous silicate deposits, 694
Aluminum sulphate, conversion of, 397
Alunite, 397
Amblygonite, 455
American Institute of Mining Engineers Series, review of four books by, 402
Analyses (see Chemical Analyses)
Anamorphism, iron-bearing formation, 770
Ancient literature of economic geology, 20
Ancient mines, age of, 22
Ancient mining, central France, 25
Ancient times, Economic geology and its allied sciences in (Sagui), 20
Andersen, O., on a biotite crystal, 455
Anderson, A. L., *Genesis of the mica pegmatite deposits of Latah County, Idaho*, 41–58
on Lava Creek district, Idaho, 331
Andrews, E. C., on pipe-like pegmatites, 461
Ankerite, 135
Anthraxylon, 563
Aplite, 206
Appalachian geologic cycle, Paleozoic, 311
volcanism, 312
Appalachians, central, Triassic contact metamorphism, 619
Appel, J. E., *A film method for studying textures*, 383–388
Application of the quartz spectrograph to the study of opaque minerals (Haycock), 364
Aquamarine, Conquista, Bahia, 291
Minas Geraes, 290
Arshinoff, V. V. and Merenkoff, B. J., on lime in asbestos, 176
Asbestos, brittle, origin, 175
Asbestos veins, origin, 649
Ashley, G., on slope of the pre-Cretaceous surface, 623
Asphalt deposits of western Kentucky, The origin of the (Russell), 571
Augite syenite, 727

Aurousseau, M. and Washington, H. S., on nepheline syenite, 619
Autometamorphic reaction, 652

Bacteria in Brainerd, Minnesota water supply, 761
Bacteria in oil-field waters, 425
Bacterial origin of hydrogen sulphide, 424
Bain, G. W., on chrysotile asbestos and solutions, 634
on geology of Harricana and Bell River basins, 708
Wall rock mineralization along Ontario gold deposits, 705–743
Bain, H. F., review of book by, 609
Van Hise, C. R. and Adams, G. I., on the origin of chert breccias, 474
Bakelite, Mounting polished surfaces in (Fuller), 393
Baker, C. L., *Disseminated galena in the upper Cambrian of the central mineral region, Texas*, 163–170
on disseminated galena, 607
Ball, S. H., on cryolite, 455
on Hartville, Wyo., iron deposit, 310
Ballard, S. M., on Boise County, Idaho, 332
Bancroft, H. H., on gold recovery, 257
Bancroft, J. A., on Kienwisik gold area, 708
Banded coals, Rôle of water conditions in the formation and differentiation of common (White), 556
Banded ore, types, Cornwall, Pa., 215
Barite, 501
Barlow, A. E., on norite, 276
Barrell, J., on regional metamorphism, 154
on the emanation of mineralizers, 238
Barton, D. C., review by, 189
Bartow, E., on manganese in water supply, 753
Basaltic differentiation, 617
Bascom, F., on metamorphosed shale, 620
Basin Range faulting in mines at Bingham, Utah, Influence of (Farmin), 601
Bastin, E. S., *The chalcocite and native copper types of ore deposits*, 407–446
on chalcocite and native copper deposits, 500
on natural reduction of sulphates, 424
Bastin, E. S.—*Continued*
on pyrrhotitic peridotite, 408
reviews by, 82
Bateman, A. M., on barite, 501
on copper deposit, Bristol mine, 500
on Glacier Creek, copper deposit, 437
on silky and harsh chrysotile, 171
reviews by, 85, 185, 295, 508, 509
Bateman, A. M. and McLaughlin, D. H., on geology of Kennecott copper deposit, 437
Bauxite, association with lignite, 396
Tikhvin, 506
Bayley, W. S., on iron mines and mining in New Jersey, 658
on semi-kaolinized orthoclase, 489
reviews by, 84, 87, 186, 188, 401, 608, 701, 787, 789
Baylis, J. R., on manganese in water supply, 759
Becher, H. M., on cupriferous shales, 415
Becker, G. F., on double sulphides of metals, 773
on the solution of pyrite, 1
Behre, C. H., on origin of bauxite deposits, 506
on the origin of Arkansas bauxite, 395
Bell, J. M., on Spassky and Atbasar copper mines, 415
Bell, R. N., on the gold content of gravel bars, 259
on the origin of fine gold, 258
on Thunder Mountain, 589
Belshazzar mine, gold, 340
Belt series, quartzites, 482
Benson, W. N., on the origin of serpentine, 634
Berry, E. W., on pre-Miocene of Washington, 483
Bertrand, A., on prehistoric battle-axes, 26
Beryl, 51, 455
Glycerio, Rio de Janeiro, 291
Rio de Janeiro, 290
Sant. Anna da Onça, Minas Geraes, 290
and aquamarine, Lajão, Espirito Santo, 290
Beryllium minerals, Theophilo Ottoni, Bahia, 291
Beryllium minerals in Brazil (Moraes), 289
Bethlehem Steel Co., analyses by, 198
Beyschlag, F. and Michael, R., on manganese, 754

Bibliography, asbestos, brittleness in, 176
Postmasburg, manganese deposits, 122
Red Beds, copper deposits of, 444
Snake River, fine gold and platinum, 264
Billings, G. D., review by, 608
Billings, M. H., reviews by, 187, 294
Bingham quartzite, 603
Bingham, Utah, Influence of Basin Range faulting in mines at (Farmin), 601
Binz, C., on alkalinity produced by bacteria and algae, 762
Biotite, 139, 147, 203
decomposition of, 487
Bird Dog well, 467
Biwabik formation, anamorphism, 770
Bleaching in red sediments, origin, 437
Blinkklip breccia, 100
Boghead or alga coal, 566
Boise Basin, Idaho, The lode deposits in the (Ross), 329
Boleo, copper deposit, genesis, 426
Books received, 88, 190, 297, 403, 510, 610, 701, 790
Boone formation, 463
alteration, 783
chert, 80, 465
Bornite, 497
Boswell, P. G. H., review of book by, 789
Bottino and Argentiera, Tuscany, mining, 23, 30
Boulangerite, spectroscopic determination, 379
Boutwell, J. M., on ore types at Bingham, 604
Bowen, N. L., on differentiation of a nepheline syenite, 619
on geologic thermometry, 745
on the "reaction principle", 153
Brainerd, Minn., removal of manganese in water, 760
Brazil, Beryllium minerals in (Moraes), 289
Brecciated zones, origin of, 470
Brecciation, gravity load type, 783
Brittleness in chrysotile asbestos, The cause of (Soboleff and Tatarinoff), 171
Broderick, T. M., on the formation of native copper, 632
on the weathering of basic rocks, 307
Brögger, W. C., on the ideal metamorphic series, 144
Bronze age, 27
Broughton, M. N., on Texas fuller's earths, 362
Brown, J. C., on oxygen in ground water, 758
Bruce, E. L., review of book by, 790
Buddington, A. F., on the Hyder district, Alaska, 376
Buerger, M. J., on brines in cavities in galena, 477
Burchard, E. F., on Canyon Creek, Ariz., iron deposit, 310
Burfoot, J. D., on the origin of talc and soapstone in Virginia, 635
Burrows, A. G., on the Porcupine gold area, 708
Butler, B. S., *Ore deposits of the United States in their relation to geologic cycles*, 301–328
on copper deposits, 500
on the transportation of iron, 243
and Burbank, W. S., on copper arsenides, 429
on the origin of native copper, 632
and others, on copper deposits of Utah, 415
Buttgenbach, H., on uranium-bearing veins, 453
Byram gneiss, 661

Cairnes, C. E., on the serpentine belt, Coquihalla region, 635
Calcite, rare earths in, 476
Calcium carbonate, hydrothermal transfer, 472
Callahan, W. H. and Newhouse, W. H., on contact metamorphism at Cornwall, Pa., 235
Callahan, W. H. and Newhouse, W. H. on high and low temperature minerals, 628
Campbell Rand dolomite, 99
Camp Bird, vertical changes at, 538
Camp Harding, New Mex., pegmatite, 457, 459
Campiglia, Italy, ancient mining at, 24
Canneloid deposits, 565
Cap Mountain formation, 165, 607
Carbohydrates in plant structures, 559
Carbonate, rock and hydrothermal, 135
Carbonatization, 721
Casapalca, vertical changes, 538
Catalysis and its bearing on origin of Lake Superior iron-bearing formation (Zapffe), 751

Cause of brittleness in chrysotile asbestos (Soboleff and Tatarinoff), 171
Caves, crystal-lined, origin, 472
Central mineral region, Disseminated galena in the upper Cambrian of the (Baker), 163
Chalcocite, hypogene, origin, 501
Chalcocite and native copper types of ore deposits (Bastin), 407
Chalcocite deposit, Great Bear Lake, Canada (Riley), 496
Chalcocite zones of downward enrichment, 410
Chalcopyrite, 284
  Cornwall, Pa., 224
Challis volcanics, 331, 590
Chapman, E. P. and Stevens, R. E., *Silver and bismuth-bearing galena from Leadville*, 678–685
Chattanooga shale, relation of oil, gas, and asphalt to, 578
Chauvet, G. and Chesneau, G., on ancient mining in France, 25
Chemical analyses—
  altered andesite, 325
  clay, Latah County, Idaho, 493
  minerals, 488
  Sunnyside Mine, 595
  Conochocheague limestone, 198
  Cornwall diabase, 204
  cummingtonite, Homestake, 137
  epidotized felsite porphyry, 433
  ferruginous cherts, 325
  garnetized limestone, 325
  hematite, Sierra Leone, 65
  hornblende nelsonite, 271
  manganese, Postmasburg, South Africa, 117
  montmorillonite, 347
  siliceous chert, 325
  silicified andesite, 325
  silver and bismuth-bearing galena, 684
  Triassic, Pennsylvania, iron ore 215
Cherokee shale, transportation, 784
Chert, 80
  breccia formation, 473
  origin of, 464
Chertification, 469, 780
Chester sandstones, 575
Chester, Vermont, high temperature talc deposit, 643
Chitistone limestone, 437
Chlorite, 227
  aureoles, 668
  columnar, veins, 738
  formation, 147
  origin, 650
Chlorite—*Continued*
  rock and hydrothermal, 139
  and gold, association, 159
Chloritization, "blackwall", 640
Chrysotile asbestos, The cause of brittleness in (Soboleff and Tatarinoff), 171
Cirkel, F., on brittleness in chrysotile, 171
  on a phlogopite crystal, 455
Cissarz, A., on spectroscopic analysis, 365
Clarain, 564
Clark and Mathews, on the physical features of Maryland, 615
Clarke, F. W., on reactions of manganese and iron, 756
Clay, hypogene origin, 597
  residual, from metamorphic rocks, 483; granitic origin, 483, 491
Cleavage, secondary, oblique, 724
Clinton iron ores, 312
Coal, factors affecting formation of, 557
Cobalt, Ontario, hydrothermal position, 539
Cobalt in pyrite, 223
Coeur d'Alene, vertical persistence of ore, 536
Cole, A. A., on drilling at the Hollinger mine, 707
Coleman, A. P., on norite, 276
Collins, W. H. and Quirk, T. T., on origin of iron formations, 306
Collodion, film casts, 383
Colloform banding, 540
Colloidal ferrous sulphide solutions, 5
Colloidal silica, 475
Colloidal solutions, precipitation of, 439
Colony, R. J., on magnetite, southeastern New York, 671
  on secondary hornblende, 279
Comeback lode, 335
Commercial clays of northern Idaho. The composition and origin of certain (Tullis and Laney), 480
Composition and origin of certain commercial clays of northern Idaho (Tullis and Laney), 480
Comstock, Nev., vertical range, 542
Comstock, T. B., on galena of central mineral region Texas, 163
Connolly, J., on the paragenesis of the Homestake formation, 132
Connolly, J. and O'Hara, C., on the origin of the Homestake mineralization, 157
Conococheague limestone, 210

Contact-metamorphic deposits, mineralogical comparison, 248
Contact metamorphism, Triassic, Central Appalachians, 619
Cooke, C. W. and Stephenson, L. W., on post-Cretaceous erosion in New Jersey, 623
Cooke, H. C., on geology of Rouyn-Harricanaw region, 707
on the asbestos deposits of Thetford, Quebec, 635
Copper age, 27
Copper arsenides, 429
Copper deposits, central Appalachians, Triassic, zoning, 628
contact-metamorphic, 409
Cornwall, Pa., 212
in basic volcanics, 438
Lake Superior type, 429
orthotectic, 408
Red Beds type, 411
the "standard", 410
Copper deposits and organic material, 415, 423
Copper minerals, Cornwall, Pa., 224
Copper-transporting solutions, composition, 418
Cordilleran geologic cycle, 317
Cornwall, Pennsylvania, The iron ore deposits at (Hickok), 193
Cornwall, Pennsylvania, copper ore, 212
Cornwall and French Creek, Pennsylvania, comparison of, 250
Corocoro, Bolivia, copper deposit, genesis, 430
hydrothermal position, 539
Corson, H. P., on manganese in water supplies, 753
Corundum, 638
Cramer, R., review of book by, 189
Cretaceous, former extent, 621
Crook, T., review of book by, 787
Crystallization-brecciation, 101
Cubanite, 284
Cumingtonite, 137, 144

Dacite porphyry, 335
Dake, C. L. and Bridge, J., on the age of the Ellenburger limestone, 166
Daly, R., review of book by, 701
Dammer, B. and Tietze, O., on fuller's earth, 344
Dana, E. S., on octahedral cleavage in galena, 682
Darton, N. H., on the traps of Newark System in New Jersey, 614
Datolite, 229
David, T. W. E., review of map by, 86
Davies, G. M., review of book by, 88
Davis, C. W., on the age of uraninite, 461
Davis, E. F., on radiolarian chert, 319
Davis, W. M., on Cretaceous sediments, 621
on solution channels, 471
on the Triassic of Conn., 614
Day, D. T. and Richards, R. H., on detrital ilmenite and chromite, 259
on detrital platinum, 263
Decolorization by fuller's earth, theories of, 361
Definition, leptothermal, 537
of term pegmatite, 462
De la Vincelle, G., on prehistoric battle axes, 25
Democritus, philosophy of, 21
Deposition, Kupferschiefer, Mansfeld, 428
Depth-zones in ore deposition (Graton), 513
Devereaux, W. B., on the age of the Homestake mineralization, 158
Diabase, Triassic, Cornwall, Pa., 199
Diabase pegmatite, differentiation, 618
Diagrams—
ancient mine surveying instruments, 39
dehydration curves for clay mineral, 348
disseminated ilmenite-apatite ore, 268
capillary measurement of solutions, 370
equilibrium diagram: SiO_2 $MgSiO_3$, and Mg_2SiO_4, 654
fringes about metacrysts in wall rock of gold lodes, 715
gold in mineralized wall rock, Pearl Lake, 710
Hartmann diaphragm, 366
lens of altered ultrabasic, Chester, Vermont, 644
manganese removal plant, Brainerd, Minnesota, 766

Tourmaline, 50

Touwaide, M. E., on the Boleo copper deposit, 426
Trask, P. D., on the origin of the Mansfeld copper shales, 427
review of book by, 296
Triassic area, Mineral zoning in New Jersey-Pennsylvania-Virginia (Newhouse), 613
Tri-State district, ore deposits, 75, 463, 780
Troilite, synthetic, 4
Tryon, F. G. and Eckel, E. C., review of book by, 402
Tullis, E. L. and Laney, F. B., *The composition and origin of certain commercial clays of northern Idaho*, 480–495
Turner, N. L., on the origin of fine gold, 258
Twenhofel, L. H., on oxidized magnetite, 220
Twenhofel, W. H., review of book by, 295
Tyrell, G. W., on metamorphic provinces and rock series, 141

Ultrabasics, alteration by acid intrusives, 646
Umpleby, J. B., on intrusions and mineralizers, 238
on the age of the Idaho batholith, 482
and Livingston, D. C., on Thunder Mountain district, 589, 591
and others, on Wood River Region, Idaho, 331
Underground water, circulation, 470
in Red Beds, composition, 419
iron and manganese, 752
Upper Cambrian of the central mineral region, Disseminated galena in the (Baker), 163
Upper Ledge formation, 131
Urbain, G., on rare metals in sphalerite, 476
Urban, H. M., on Spruce Pine muscovite, 455

Valley County, Idaho, The Thunder Mountain mining district (Ross), 587
Van Aubel, R., on minerals of uranium-bearing veins, 453
Van Hise, C. R. and Leith, C. K., on iron deposits of Lake Superior, 306, 751
Veins, high and low grade, distinction of, Kirkland Lake, 729; at Pearl Lake, 717
Veins—*Continued*
Nos. 5 and 13, McIntyre mine, 724
Vermiculite, origin, 646
Vertical range, hydrothermal zones, 532, 535, 538, 542, 551
Veteres, G., on the use of geometry by the Romans, 38
Viscont, K. I. and Siromiatnikoff, F. B., on the composition of asbestos, 173
Vitrain, 563
Vogt, J. H. L., on orthotectic copper deposits, 408
Voit, F. W., on copper deposits at Senze do Itombe, Angola, 415
Volcanics, as a source of mineralization, 598
Vollmer, D., on manganese filtration, Dresden, Germany, 760

Wagner, P. A., on manganization of hematitic breccia, 112
on pipe-like pegmatites, 461
on varieties of magnetite, 221
Waksman, S. A., on resistance of plant parts to decay, 559
on soil bacteria, 754
Walker, R. T., on calcium carbonate transfer, 473
Walker, T. L., on amphibolite, 277
Wall-rock alteration, Boise Basin, 338
Wall-rock mineralization along Ontario gold deposits (Bain), 705
Walton, J., on film casts, 383, 385
Washburn, W. H., on the origin of fine gold and platinum, 258
Washington mine, injection gneiss, 663
Washington vein, 664
Water, critical temperature of, 242
solubility in silicate melts, 657
Watson, T. L., on igneous rocks of west central Va., 267
on native copper occurrences, 433
and Cline, J. H., on dikes in Virginia, 619
and Taber, S., on the exploitation of ilmenite-apatite, 266
Weathering and the origin of ore deposits, 514
Weed, W. H., on zoning, 629
Weibull, M., on manganese, 753
Weidman, S., on chertification of Boone formation, 780
on faults of the Ozark dome, 315
on Miami-Picher district, 463
review of book by, 82

Weigel, O., on the solubility of ferrous sulphide, 8
Weinert, F., *Formation of martite and other iron oxides of the Marquette District, Michigan,* 68–74
Well waters, analyses, discussion, 421
Weller, J. M., on Edmondson asphalt deposits, 577
Wentworth stage, 696
West central Virginia, The ilmenite-apatite deposits of (Ryan), 266
Western Kentucky, The origin of the asphalt deposits of (Russell), 571
Weston, R. S., on the occurrence of manganese, 759
on the solution of iron and manganese, 757
Wherry, E. T., on the properties of bentonite, 363
on zoning, 629
White, D., *Rôle of water conditions in the formation and differentiation of common (banded) coals,* 556–570
on the origin of fusain, 567
on the replacement of wood, 426
and Twenhofel, W. H., on carbonaceous sediments, 556
Wilberns formation, 166
Wilhelm, D., review of book by, 295
Williams, A. F., review of book by, 185
Williams, I., on quantitative microscopical analysis, 696
Wilson, H., on clays and shales of Washington, 482
Wilson, H., Bennett, A. L. and Heath, F. T., on kaolin and feldspar, 482
Winchell, A. N., on pigeonite, 202
Winchester, D. E., review of book by, 294
Witwatersrand, vertical persistence, 535
Woodworth, J. B., on the Atlantic Coast Triassic coal field, 615

X-ray analyses, fuller's earth, 361
X-ray analyses, silver and bismuth-bearing galena, 678

Zapffe, C., *Catalysis and its bearing on origin of Lake Superior iron-bearing formations,* 751–772
on manganese, 754
on precipitation of manganese, 112
Zies, E. G., on hydrogen sulphide, 477
on the origin of mineralizing solutions, 598
and others, on ferrous and cupric sulphate, 422
Zinc-lead district, The Miami-Picher (Tarr), 463
Zonal theory, 516
Zoning, copper deposits, Lake Superior, 632
Cornwall, Pa., 229, 236
hydrothermal minerals, 155
Triassic, central Appalachians, 628
